

Salmon River

Square Footage:

Main Level: 1461 square feet

Upper Level: 782 square feet

Total: 2243 square feet

The Salmon River is solid as a rock and ready to deliver peace and quiet. This one is a time tested design with straight forward lines and a front porch that says relax and stay a while. The upper level Master Suite allows ample room to spread out. The gable dormers give interesting angles to work with inside, and a good place to put a cast iron soaking tub. The loft gives you a private retreat to think about the days events... and plan the trip for tomorrow. This Caribou design is for the people who are tired of roughing it. You deserve it.

Options:

Extend the porch around the other side and a door from the first floor bedroom to extend the outside spaces.
