

Horse Point

Square Footage:

Main Level: 3750 square feet

Upper Level: 2260 square feet

Optional Lower Level: 3750 square feet

Garage: 810 square feet

Porches/Deck: 1280 square feet

The very definition of what makes a Caribou Creek luxury log home. In this plan we artfully incorporated all the best elements of the different styles of log building. From the post & beam prow to the stacked log walls to the log trusses and purlins of the roof system, this house has it all. Enjoy nature from the comfort of the spacious screened porch. Chat with your guests as you enjoy the view from the large windows in the great room. Soak in the cozy tub room in the master suite. Watch the sun set from the private

balcony of the upper level suite. Whatever your definition of luxury, you are certain to find it here. Twin sweeping staircases lead from the foyer to the open loft overlooking the great room. Another staircase leads to the optional lower level, the perfect apartment suite for visiting guests and family. Or, open it up for a big rec/party room. If you would rather have a log spiral staircase, we can do that too. Customize to your heart's content!
