

## Indian Oak

Square Footage:

Main Level: 3840 square feet

Garage: 1260 square feet

Covered Porch 2460 square feet

Do you love the outdoors? Would you rather spend time outside with your family than sitting inside watching TV? This is your house! Designed for an outdoor lifestyle with over 2400 square feet of covered exterior space, you can spend your days outside, rain or shine. Standard two car garage plus a good sized workshop area means you no longer have to move the car (or worse, leave it permanently parked outside) to work on a project. The wide open center living area with a vaulted ceiling is the ideal place to showcase a couple of our spectacular handcrafted log trusses. Add in a stone fireplace for atmosphere and to chase out the winter chill. One of the benefits of having everything on one level is handicap accessibility in case of an accident or disability. Like all of our plans, we can customize to fit your needs.
